

AMENDMENTS TO THE CLAIMS

1-51. (Cancelled)

52. (Currently Amended): A method for fabricating a stereoscopic display device, comprising:
preparing a display panel having first and second pixels for displaying left-eye and right-eye image information, respectively; and
forming a polarizer on the display panel;
forming an adhesive layer on the polarizer;
forming a transparent substrate on the adhesive layer;
forming a retardation layer on the transparent substrate without an alignment layer between the retardation layer and the transparent substrate, the retardation layer including a chiral dopant with a predetermined pitch;
forming first and second polarizing cell areas in the retardation layer corresponding to the first and second pixels over the display panel by a single light irradiation through a mask;
and
mounting the retardation layer on the transparent substrate to the display panel.

53. (Previously Presented): The method according to claim 52, further comprising polymerizing the retardation layer by irradiating a light.

54. (Previously Presented): The method according to claim 52, wherein the display panel is a liquid crystal display (LCD) panel.

55. (Previously Presented): The method according to claim 54, wherein the polarizer integrally formed with the retardation layer.

56. (Cancelled)

57. (Previously Presented): The method according to claim 52, wherein the transparent substrate includes a solvent-proof polymer.

58. (Cancelled)

59. (Previously Presented): The method according to claim 53, wherein the first and second polarizing cell areas are arranged in alternating lines.

60. (Previously Presented): The method according to claim 53, wherein the first and second polarizing cell areas are arranged in a checkered pattern.

61. (Previously Presented): The method according to claim 53, wherein the retardation layer is covered with a protecting polymer.

62. (Previously Presented): The method according to claim 52, wherein forming the retardation layer having first and second polarizing cell areas does not include removing a portion of the retardation layer.
